Mac

1. Copy the .icc file into Library/ColorSync/Profiles in your home folder (Finder: Go, Go to Folder).
2. Print from Preview, Photos, Affinity or Photoshop.
3. Color Matching: ColorSync, profile StickiPLY ET8550 Gloss Photo 180.
4. Print Settings: Premium Glossy, Quality, Color Settings Off. Save as a preset.

Windows

1. Right-click the .icc file, Install Profile.
2. In Photoshop or Affinity: the application manages colours, profile StickiPLY ET8550 Gloss Photo 180, Relative Colorimetric, Black Point Compensation on.
3. Printer properties: Premium Glossy, High. More Options, Color Correction Custom, No Color Adjustment.
4. App without colour management? Color Correction Custom, ICM, printer profile StickiPLY, input sRGB.

Good to know

- Judge a print after ten minutes. Dye ink settles darker as it dries.
- The profile is accurate, not boosted. Want punchier? Raise saturation in your app, not in the driver.
- Pure magenta and neon orange are beyond the ET-8550 inks on any paper; you get the closest colour.
